Machine Operator

Job description

We are looking for a skilled Machine Operator to maintain and operate machinery. A great machine operator is reliable and able to work with attention to detail and safety standards. On-the-job training is a good way to discover how to do the job better, so you should have willingness to learn and improve. Being a team player is essential since all tasks will require close collaboration with co-workers. The goal will be to ensure that production procedures will be carried on smoothly to maximize efficiency and profits.

Responsibilities

- Control and adjust machine settings (e.g. speed and settings)
- Test operation of machines periodically
- Fix issues that might occur during the shift
- Check output to spot any machine-related mistakes or flaws
- Keep records of approved and defective units or final products
- Maintain activity logs
- Cleaning the machine after every shift

Skills

- Understanding of production procedures
- Adherence to health and safety regulations (e.g. constant use of protective gear)
- Analytical skills
- Attention to detail
- Teamwork and communication skills
- Physical stamina and strength
- Lifting 40lbs frequently
- Concrete experience is a plus
- Forklift operation is mandatory but will train
